M1 MSc DataScience Scientific writing - Written assessment

October 9th, 2020

Introduction to the exercises

You are expect to write a position paper of 1-3 pages about a topic of your interest. A position paper is a written statement that explains a personal (or corporative) view of a certain topic. It typically provides an introduction about the theme citing relevant references in the field, and then it provides pros and cons with a personal (or corporative view) about the problem. Sometimes it includes at the end some ideas for future work in the field. All references about the work must be duly cited.

The paper must be written in Latex and follows the format Springer Lecture Notes in Computer Sciences.

All materials used in class are allowed and you can browse the Internet for looking for content.

The exercises are individual.

Exercise 1

You can propose a topic of your interests of chose among one of the following ones:

- Autonomous cars;
- General Data Protection Regulation;
- Human-Robot Interaction;
- Information Visualization and Covid-19 pandemic;
- …

Exercise 2

From a structural point of view, the paper must contain section, subsections, at least one figure, one table, and references. Use the table to organize the pros and cos.

OBS. We didn't have seen how to write tables in Latex during the courses but you have a book and you can also use the internet.

Exercise 3

Once your paper is finished, you must pack the file(s) and send the source files as well the PDF by email to winckler@unice.fr.

IMPORTANT: your paper will be checked against plagiarism using automated tools.
